

## Wall Mount Enclosure: MTP cassette solution

The pre-terminated cassette can be used on the Wall Mount enclosure:

24c MTP-LC cassette

12c MTP-LC cassette

From 48 ~ 96 fiber LC connection per enclosure (Fully loaded)  
2 layer version

Size: 355 x 298 x 91 mm

From 24 ~ 48 fiber LC connection per enclosure (Fully loaded)  
2 Layer version

Size: 330 x 215 x 98 mm

Tel: 0061(0)2 8003 3372; Email: [sales@ksm.com.au](mailto:sales@ksm.com.au)

**From 24 ~ 48 fiber LC connection per enclosure (Fully loaded)**  
**1 layer version**

Size: 295 x 228 x 39.5mm

**Cassette face plate options**

## KSM SOLUTIONS MTP FIBRE PRODUCTS

### MTP-MTP Mini Round 3mm cable

MTP-MTP mini 3mm round cable assembly is superior than the ribbon cable in flexibility or crush resistance. Other Round cable construction like 1.6mm, 2mm, 4.5mm (double jacket) are also available.

MTP Round : 2mm, 3mm, 4.5mm (Double Jacket)

MTP Round 3mm with Aqua boot

### Cable Properties:

No of Fiber	Jacket Dia mm	Tensile Force N		Min Bend Radius* mm		Crush Resistance N/100mm
		Short Term	Long Term	Short Term	Long Term	
12	3mm	180	90	30	45	300
24	3mm	110	60	30	45	300

UL: OFNR, OFNP Rated cable, LSZH also available  
RoHs compliance

### Optical Properties:

<b>Connector Loss @ 850nm</b>	<b>MTP (MM)</b>
Normal MM performance	< 0.60 dB
Elite MM performance (Low Loss)	< 0.35 dB
<b>Return Loss @ 850nm</b>	
Normal performance	> 20 dB
Elite performance (Low Loss)	> 25 dB

<b>Connector Loss @ 1310nm</b>	<b>MTP/APC</b>
Normal SM performance	< 0.75 dB
Elite SM performance (Low Loss)	< 0.35 dB
<b>Return Loss @ 1310nm</b>	<b>MTP/APC</b>
Normal performance	> 60 dB
Elite performance (Low Loss)	> 60 dB

## KSM SOLUTIONS MTP FIBRE PRODUCTS

### Harness Cable (External)

For External applications, where the assemblies are situated outside of enclosures protection, the ruggedised Harness assembly can allow pulling, bending and sustaining the cable weight. Employing the latest design of 250 micron fibers inside 3mm round cable, it is easy for ribbonization and has overcome the side loading / twisting issue in traditional ribbon cable. This is usually used in Direct connection between the servers.

3mm MTP-Uniboot LC 24F Harness Cable

3mm MTP-LC 8F Harness Cable

### MTP Coupler

Various MTP coupler are designed to meet different needs.

Ganged MTP Coupler 1 x 4

#### Three Main options:

- Full Flange (Key Up to Key Down)
- Small Flange (Key Up to Key Up)
- Reduced Flange SC Foot print

Shuttered MTP Coupler

Ganged MTP Coupler 2 x 8

EMI MTP Coupler

### Fiber Performance

Fiber Type	Max Attenuation				Bandwidth		Max Application Support Distance on 850nm SX
	850nm	1300nm	1310nm	1550nm	850nm	1300nm	10G
micron	dB / km				MHz-km		m
OM1 62.5 /125	2.70	0.80		-	200	600	33
OM2 50/125	2.50	0.80		-	500	500	82
OM3 50/125	2.50	0.80		-	1500	500	300
OM4 50/125	2.50	0.80		-	3500	500	550
G652D 9/125	-	-	0.35	0.21	-	-	-
G657A1 9/125	-	-	0.36	0.22	-	-	-

### Connection Method

For Non 40G / 100G cabling connection, Connectivity Method D is used to utilize every fiber channel. As different combination of 40G / 100G switch / servers are used, please refer to the “Cabling Applications Note: Connectivity of 100G Networks” on the connection.

Connectivity Method D
